

Name: _____

Do a Water Audit

Directions: Read the article “Water Worries” (page 22). Then fill out the chart to find ways you and your household can save water. Skip any appliances or taps your home doesn’t have.

Appliance/tap	Number of times used daily	Number of minutes the water is running each time	Can we use less?
Kitchen or bathroom faucet			
Toilet			
Shower/bathtub			
Dishwasher			
Washing machine			
Outdoor sprinkler			

1. Name one appliance or water tap you noted above that can be used less often or for a shorter amount of time. _____

2. What can be done to help this appliance or tap use less water?

3. Think about your school. Are there any places at school where you think water could be saved?
