So you don't have a dictionary handy, and you need to figure out the meaning of an unfamiliar word? Don't worry. One way to determine the meaning of a word is to use the context clues, or surrounding words to help you understand the general meaning of a sentence.

Example:

I understand your **quandary**—as an animal lover, you don't want to dissect a frog. However, dissecting an avocado is not a logical substitute.

Ⓐ excitement Ⓑ dilemma Ⓒ nervousness Ⓓ joy

The correct answer is Ⓑ dilemma. Why? Notice how the words *don't want to dissect a frog* and *however* support the meaning of *quandary*. Those context clues tell you that *quandary* has a negative connotation. It is not a positive word. If you're still not sure of the answer, try plugging in each of the answer choices to see what fits.
