

Name \_\_\_\_\_

# Creep Out!

Hop to it! Use the Venn diagram to **compare** and **contrast** grasshoppers and spiders. Comparing is noticing how two or more things are alike. Contrasting is noticing how they are different. The 10 features below describe grasshoppers, spiders, or both.

- Write the letters for the features that describe only **grasshoppers** in the left-hand circle.
- Write the letters for the features that describe only **spiders** in the right-hand circle.
- Write the letters for the features that describe **both** in the middle section.

Don't let it bug you if you don't know all the answers! Use books and the Internet for help.

- A.** have fangs
- B.** females lay eggs
- C.** can fly
- D.** have eight legs
- E.** are insects

- F.** have chewing teeth
- G.** live in Papua New Guinea
- H.** spin webs
- I.** most are poisonous
- J.** have six legs
