

Name: _____

Create a Coat of Arms

In medieval times, knights carried shields with different designs on them. The design, called a coat of arms, represented each knight's heritage. Create a coat of arms for your family on the blank shield below. Each section of the shield should reflect an idea, an event, or a characteristic that represents your family. You might include a flag of the country where your ancestors came from or foods that are common in your family's culture.
